

WHY IS SCIENCE OF READING ALIGNED TRAINING ESSENTIAL FOR STUDENT SUCCESS?

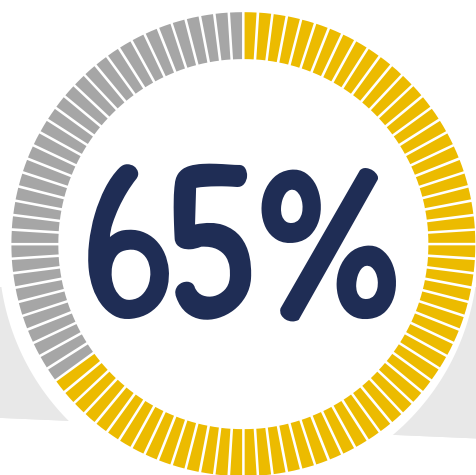

49% of teacher preparation programs do not train teachers on instructional methods that are research-based

→ In 2013, Mississippi passed legislation that required training in science of reading supported instruction. Between the years of 2013 and 2019, Mississippi's 4th grade reading scores grew from 39th in the country to the 2nd place spot!

2019 National Center for Education Statistics

→ 60% of students require moderate to extensive explicit instruction.

→ 65% of students scored below proficient in the area of reading

Never worry that students are slipping through the cracks again!

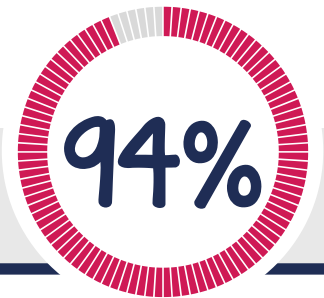

The Reading Roadmap PD provides the background and training on research-based science of reading strategies that provide the explicit and systematic instruction that students need to develop a strong literacy foundation.

Included in The Reading Roadmap-

- Lifetime access to on-demand video trainings to build students' phonemic awareness, phonics, orthographic mapping, reading fluency, and comprehension
- An easy-to-use system for assessing, planning, and teaching
- Hundreds of ready-to-use lesson plans and centers
- A community of teachers who collaborate, brainstorm, and problem solve together
- Bonus content uploaded throughout the year by experts in the field of the science of reading... and SO much more!

94% of Reading Roadmap alums recommend this training to friends and colleagues

Discover the proven, research-based teaching strategies & tools that help 95% of children learn to read by the end of first grade!

The Reading Roadmap PD has already empowered teachers to help 121,770 students to read!

"I have never felt fully equipped to teach children to read, especially those that are struggling. I was hoping I would walk away with some tips and a better understanding of the reading process. I got so much more than I hoped to!" -Tricia (Sped K-6)

"This program is very comprehensive, practical and a very good deal. I love that we can rewatch the lessons and that we are giving materials to use. This is a complete program. It doesn't just tell you what to do, but also gives you the materials and guidance to fully implement the program. I would encourage all K-2 teachers to take it if possible."
-Joann (K).

"This course is excellent and strengthens the ability to teach reading for all students in my class to be successful. I feel empowered and confident!!!"
-Maureen (Kindergarten)
